17" or 22" LCD TV	9
Electric Tongue Jack	10
Microwave Box with Drawer	11
3 Drawer Cabinet	12
80 W Solar Panel & Control	13
Rear Hitch Receiver	14

Placard Abbreviation as shipped from the factory

Gross Vehicle Weight Rating	GVWR
Unloaded Vehicle Weight	UVW
Cargo Carrying Capacity	CCC
Fresh Water Weight 26 gal.	216#
Fresh Water Weight 46 gal.	383#
Propane Weight 4.75 gal.	20#
Propane Weight 9.5 gal.	40#

Vehicle means the trailer axle & tongue
UVW=TM Factory Base Weight+Factory Options Weight
CCC=GVRW-UVW-water-propane-battery(ies)
GAWR=3,500# prior to 2004. Since 2004 it is 3,500# plus TM weight not carried by the axle

Cautions

It appears the battery weight must also be subtracted from GVWR to get CCC

Batteries are not included in the Factory installation. It (they) are Dealer Installed.

New information indicates the factory has changed the way it calculates the Gross Axle Weight Ratings (GAWR). It is now 3,500# plus the weight of tires, rims & drums (items that are not carried by the axle). This value now appears to be 3,640#.

GCVW=Gross Combined Vehicle Weight=TV+TM
